

# Sogetrap

A turnkey know-how in rough environment

Earthwork . Civil engineering . Huge projects

  
**Sogetrap**

# Block

Main activities: earthwork, roads, supports made to oil companies about recognition, logistical support, water-drilling, vehicles, site facilities, drilling rig implantation.

Cellar and guide tube

Site facilities

Air strip

Opening of track

Water-drilling

Access road

Gypsum-pit

Drilling rig

# Civil engineering, block

Plant of oil CPF treatment building.

Foundation block of compressors, invert of tanks, poles support of pipe racks, concrete prefabrication.

Access road construction in cold mix asphalt.

Oil and gas processing plant - RHOURE-NOUSS

# Environment protection

Laying of geomembrane, waterproof recovery basins of drilling mud, boil off (or evaporation) evaporation pond  
Waste landfill sites

# HSE training

Employees are trained about hygien, security and environment practices

# Equipment pool

Main equipments:

- Earthwork: 12 bulls, 3 graders, 15 trucks, compactors, water trucks
- Civil engineering: mobile concrete plant 30 m3/h, mixing trucks 7m3, "merlo", formwork...
- Site facilities: they are completely independent with their own energy Vehicles 4X4

# A global service suited to environment, quality and deadlines constraints.

## Our commitment

- Construction of platform plants and access track in difficult areas, civil engineering of facilities and exploitation of hydrocarbon.
- Global control of public work projects:
  - roads, motorways
  - facilities of service and industry sector

## Our expertise

Sogetrap intervenes in all areas of public works. Thanks to only one representative, Sogetrap engages in quality and deadlines of your projects in respect of regulations concerning security and international standards of quality and environment.

## Our references

More than 150 platforms built and other works: roads, tracks, civil and military camps, civil engineering and environmental for major petroleum groups.
